## Frequency Counts for Books, Pamphlets, and Printed Sheets Records Created by OCLC Member Libraries (Set 01\_B\_nonLC)

This document presents the results of a frequency count analysis on the set of MARC records created by OCLC member libraries that describe books, pamphlets, and printed sheets. The results are reported in a set of tables below.

To view the documents which provide additional context and information concerning this analysis (including the methodology supporting this analysis, a general overview of this set and other sets by format of material, and queries used to define and extract this set from the larger dataset), please consult the *Guide to MCDU Data Analysis and Reports*.

The question numbers (Q27-Q33) in this document refer to questions developed in the document *Format Content Designation Analysis: Set Profiling and Analysis Queries*; see this document (section 3, Frequency Count Queries) for the natural language and structured query language used to obtain these results.

### 1. Control and Data Fields

**Q27: What is the number of total occurrences of all control and data fields and how many unique field tags are used?**

Total Occurrences of all Fields: 576,600,234

Number of Unique Field Tags Used: 193

**Q28: In how many and in what percentage of records is each control and data field used at least once?**

Two tables follow which give the results of this question – the first table is sorted by field tag and the second is sorted by percentage of records in the set where a field is used at least once.

**Q30: What is the number of total occurrences of each cataloger-supplied control and data field?**

**Q31: Which of these cataloger-supplied fields account for 80% and for 90% of all occurrences?**

Highlighted rows in the table indicate the approximately 80% and 90% occurrence thresholds.

Occurrences below approximately 91% are not included in this table.

The nine fields which are not considered cataloger-supplied in this set are the following: 001, 003, 005, 019, 029, 040, 066, 938 and 994. These fields are either supplied automatically by the system or are added to the records by OCLC. Please note that while the 008 field is system supplied, catalogers code values in this field according to standard practices and so it is included with these cataloger-supplied fields.

## 2. Subfields

### Q32: What is the total number of unique field/subfield combinations?

Number of Unique Combinations Used: 1,347

### Q33: In how many and in what percentage of records is each unique field/subfield combination used at least once?

Two tables follow which give the results of this question – the first table is sorted by field tag and the second is sorted by percentage of records in the set where a field/subfield combination is used at least once.
